# Auditoria de Espécies Desmembradas Pendentes de Foto

Este documento lista minuciosamente todas as espécies e morfotipos que foram individualizados a partir do desmembramento de combos ou slots sem foto no acervo curado do Argon.
O sistema garante que nenhum animal compartilhe foto errada (regra de ouro: zero falsos positivos).
Data de Emissão: 15/10/2026 | Total de Pendências Auditadas: 322 espécimes
